

1 July 2026

Microsoft 365 Licence Price Changes

Dear Customer,

Microsoft has previously announced a worldwide price increase covering some Microsoft 365 licences, reflecting its continued investment in security, AI and management capabilities across the platform.

Not all licences are affected: the increase applies only to those licences included in Microsoft's update, which you can find [here](#).

For most customers the most visible changes are to Business Basic and Business Standard, though the increase also applies to a number of Enterprise and Frontline plans. Business Premium is unchanged, narrowing the price gap between the Standard and Premium tiers.

Armstrong Bell will apply the revised pricing as follows:

Effective 1 July 2026:

- *Affected Microsoft 365 licences will move to Microsoft's revised pricing
- *All other licences will remain at their current price
- *As software is billed in arrears, the revised prices will first appear on your August invoice
